DISTINCT FROM MEDIOCRE

Afidano

## THE PROUD ADVENT

ALL NEW CIGAR HUMIDOR SERIES

## TIMELESS BEAUTY

Inspired by Apennine Peninsula art of leather craft, Afidano aims to pursue the purest aesthetics that even the most demanding connoisseurs will be fascinated.

Afidano

## EXPLICIT EXPRESSION OF STYLE

Blends in with your life with an artistic touch.  
Visually and mentally welcoming, your collection  
is there for you after your long days.

Afidano

## **FINEST LEATHER**

Select leather from Latin America ranches where the weather nurtures fine leathers. Greeting you to your collection, the scent of leather is the best top note that comes before the base note of cigar.

Afidano

## **EXQUISITE CRAFTSMANSHIP**

Even the finest leather can only do you no good. It's the craftsmanship that turns cowhide into art craft. Every Afidano humidor consumes 15+ hours of work to craft a masterpiece out of cowhide, meeting the highest standards of Afidano.

## CEDAR INTERIOR

Every time opening Afidano humidor, you'd smell the familiar heart note made by Spanish cedar. Cedar cabinet and shelves not only scent your collection but also protect them from pests, providing a secure and stable environment for aging.

## MAGNIFICENT ENSEMBLE

Our design and craftsmanship harmoniously bond Spanish cedar and South American cowhide among other materials in order to create an elegant, convenient piece of humidor. It's beautiful like a magnificent ensemble.

## INTELLIGENT STORAGE

However you expect your collection to be stored will be strictly and intelligently implemented by system. Temperature, humidity level and air volume will be exactly as you desired.

Afidano

### HPR SYSTEM

Developed by Afidano for cigar storage,  
HPR system strives to meet  
the 2 most important needs:

Accuracy and Reliability.

The 6 components intelligently interacts  
to provide a stable storage environment with  
constant temperature and humidity.

NTC ambient  
temperature sensor

Inverter  
refrigeration core

Ceramic  
heating module

High-precision flow  
control water pump

Air diffusion  
spraying module

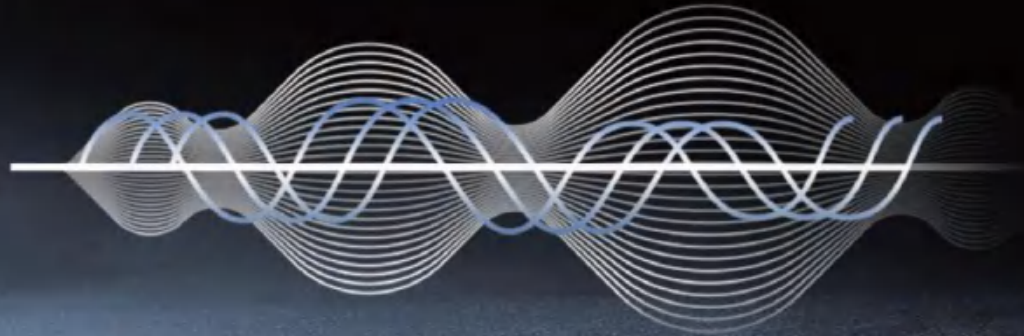

3D vortex flow  
motor fan

## TEMPERATURE: CONSTANTLY CONSTANT

When it comes to temperature control, the basic standard is to make sure it's constant at all times despite however the season changes. Ideally the temperature over time is a straight line, which is what you may expect from an Afidano humidor.

16-22°C

## HUMIDITY: INVISIBLY NURTURING

Why Cuban cigars are so reputable may have something to do with the humid sea breeze that its 6,000km coastline brings. Inside Afidano humidor water becomes water molecules, consistently nurturing your collection. Water molecules cannot be seen, but you'll be well aware your collection is being taken care of.

## AIR: MASTER THE FLOW

How to make sure every inch of space inside Afidano humidor has consistent temperature and humidity?

The key lies in the air.

With the circulating air duct, the air is circulating inside at all times to achieve so.

## TRANQUILITY

Afidano strives to fulfill your expectation not just of performance but also of tranquility. Its low working noise will not bother you, but you know it'll always be there for you.

## CONSISTENCY

Luxurious design with pure aesthetics,  
undoubtedly Afidano will be an artistic piece of  
decoration to your man cave,  
certainly demonstrating owner's style.

Afidano

## PRODUCT DETAILS

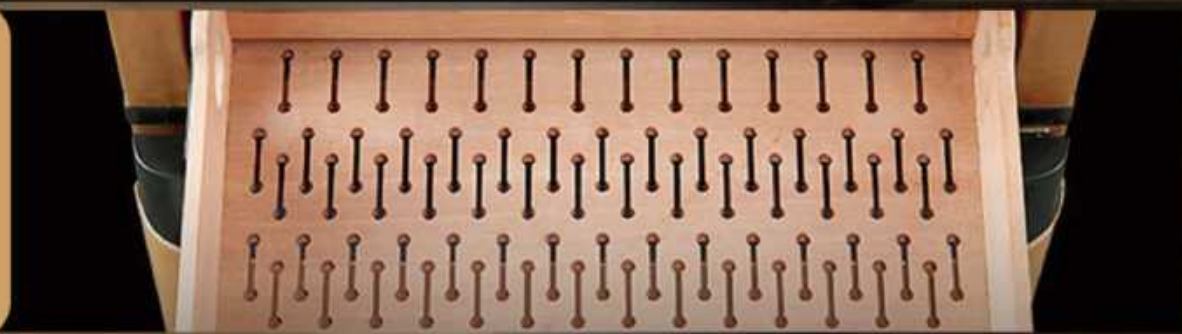

### Fingerprint Lock:

Safe and easy.  
Ideal way to  
protect your  
collection

### Cedar Interior:

Cedar shelves  
and cabinet  
as you desired.
