SAFETY PRECAUTIONS

Your safety is our top priority. Before installing and using this equipment, please read and follow these important warnings and guidelines:

1. Make sure there is enough space between the wall, cabinet, and ceiling. Don't completely seal off the back of the cabinet; provide an air vent to the outside. Caution: Maintain a distance of more than 8 inches from the cabinet to the wall.

2. Remove all external packaging materials to prevent overheating and the risk of fire.

3. Do not store flammable or volatile chemicals, as they may lead to explosions.

4. Use individual single-phase outlets, ensuring a reliable connection to a grounding wire. Caution: Do not connect the grounding wire to a water or gas pipe.

5. During transportation, avoid harsh collisions or excessive vibrations; the cabinet should not be inclined beyond 45 degrees.

6. Consult the Troubleshooting guide if the unit experiences issues. Do not attempt to resolve problems yourself; seek assistance from a certified technician.

7. DANGER: Risk of fire or explosion due to flammable refrigerant. Do not use mechanical devices to defrost the refrigerator, and do not puncture the refrigerant tubing.

8. DANGER: Risk of fire or explosion due to flammable refrigerant. Repairs should only be carried out by trained service personnel. Do not puncture the refrigerant tubing.

9. CAUTION: Risk of fire or explosion due to flammable refrigerant. Refer to the repair manual or owner's guide before attempting to service this product. Adhere to all safety precautions.

10. CAUTION: Risk of fire or explosion due to flammable refrigerant. Dispose of the product properly in accordance with federal or local regulations.

11. CAUTION: Risk of fire or explosion due to puncturing of refrigerant tubing. Follow handling instructions carefully when dealing with flammable refrigerant.

12. CAUTION: Keep all ventilation openings in the appliance enclosure or building structure free from obstructions.

13. CAUTION: Servicing should be performed by factory-authorized service personnel to minimize the risk of ignition caused by incorrect parts or improper service.

ATTENTION

It's crucial to adhere to the following safety guidelines. Neglecting these instructions may result in severe injury or damage to the appliance.

- **Ensure the appliance is connected to a dedicated outlet to prevent electrical overload and potential fire hazards.**
- **Avoid the use of extension cords.**
- **When needing to move the appliance, do not place your hands underneath it.**
- **If the appliance will not be in use for an extended duration, disconnect it from the power source.**

- After unplugging the appliance, allow a minimum of 10 minutes before reconnecting it to prevent compressor damage.

UNPLUGGING PROCEDURES

- Always ensure your hands are dry when handling the power cord to prevent electrical shocks.
- Prior to any maintenance or cleaning activities, disconnect the appliance from the power source.

GROUNDING INSTRUCTIONS

For safety reasons, ensure the appliance is correctly grounded to prevent potential electrical hazards.

PROHIBITED ACTIONS

- Do not attempt to dismantle or repair any components unless explicitly directed by the manufacturer.
- Ensure the appliance is positioned in a manner that doesn't put pressure on the electrical cord or plug.
- Avoid hanging or placing excessive weight on the appliance doors to prevent personal injury.
- The appliance is not designed to store flammable or explosive substances. Keep such materials away.
- Tampering with or altering the electrical cord is strictly prohibited.
