## INSTALLATION INSTRUCTIONS

### MO 30 STA NE

---

The minimum gap between the kitchen cabinet upper or lower panel and the appliance is  $\frac{1}{8}$ ". This dimension must be added to the height listed in the drawings

For any combinations of built-in models, please see related installation drawings

---

Bertazzoni recommends to operate the appliance after it has been installed in a cabinet. The kitchen cabinets shall be made of materials capable of withstanding temperatures at least 117°F (65°C) above room temperature in order to avoid possible damage to the cabinets during oven usage. The appliance must be installed into cabinetry and be supported from underneath. The air intake opening at the bottom of the door must be left unobstructed.

For a flush mount installation the surrounding cabinets doors should have the same thickness as the frame (1").
